CONVEX
axminster tiles

Brintons are renowned for high quality Axminster woven products. We have gained considerable experience over the years supplying specially engineered carpets to meet the extreme conditions required by specific areas of the commercial market. Our products are proven performers worldwide in all types of situations including major Hospitality, Gaming, Cruise Lines and Public Spaces. The way in which our products have performed in heavy wear markets has confirmed that woven Axminster carpet is the optimum performer in demanding commercial situations.

The key feature of our offer is freedom

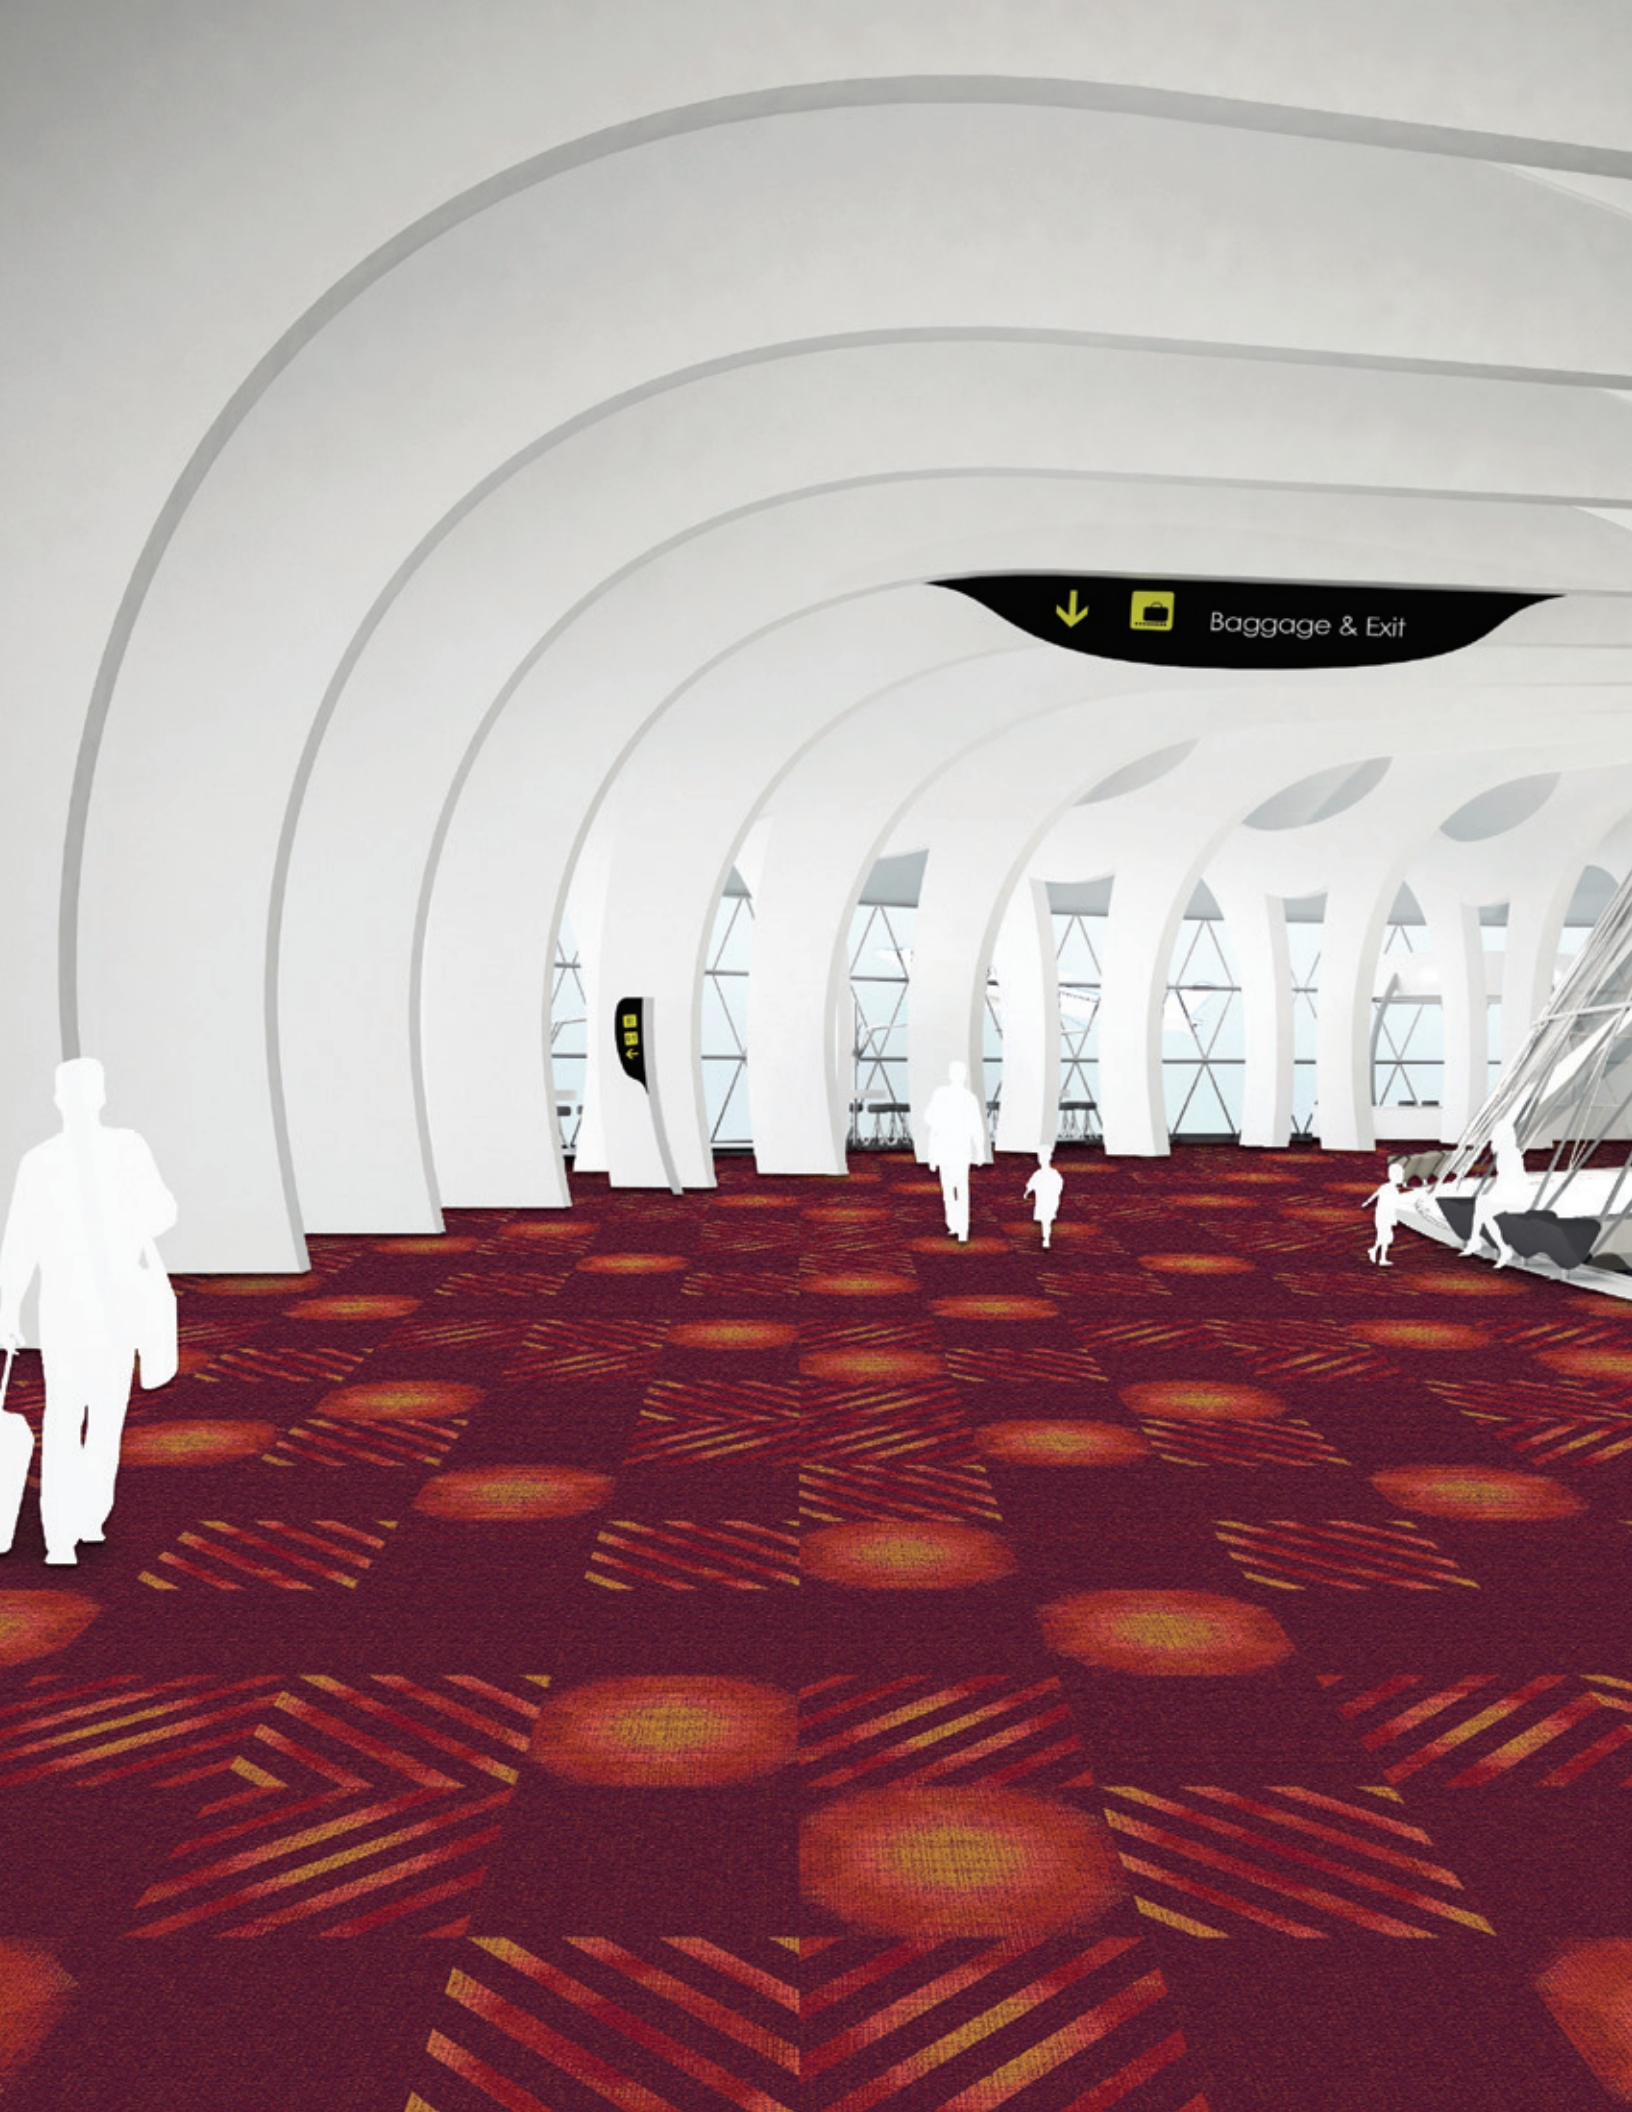

We have undertaken a long period of development in order to establish the unique advantage of the Brintons Tile product offer, combining the complexity of Axminster design within a modular form, which is suitable for heavy use areas. In our 20+ years of tile manufacture we have built up a long list of satisfied customers from all over the world, a list, which we expect, will continue to grow well into the next millennium.

Freedom of choice for the Designer in translating the well known creativity of color and design achieved in woven Axminster carpet into the modular market, more noted for the limitations placed on expression rather than freedom.

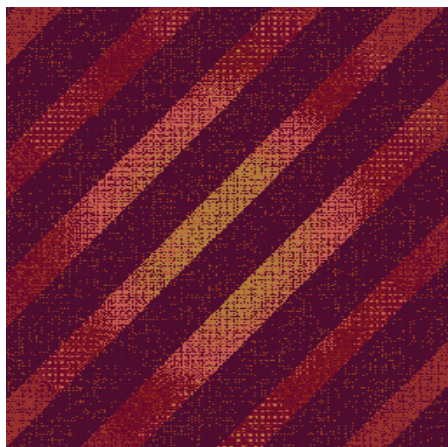

Freedom of choice for the Specifier to select the specification most suited to the physical demands of the location and the budget available through a wide range of Wool Rich and Nylon qualities designed to meet every need.

Tile provides freedom for the Facilities Manager to plan installation in the way that suits his or her needs and those of his clients rather than be driven by the disruption of installing broadloom carpet. The opportunity to speed up installation is made even greater by the introduction of 36 inch tiles.

This collection of tile designs are focused on the "mix and match" concept that allows ultimate flexibility.

TECHNICAL

Dimension Stability

Brintons Tile products are exceptionally dimensionally stable and meet the international standard requirements for tiles within ISO 2551.

Backing Material

Brintons offer two options for tile backing, Bitumen and Comfort Back. The Bitumen backing is thinner and is used for “direct stick” installations. The Comfort Back is made from 100% recycled content and allows for “pad/underlay” installations without the pad/underlay.

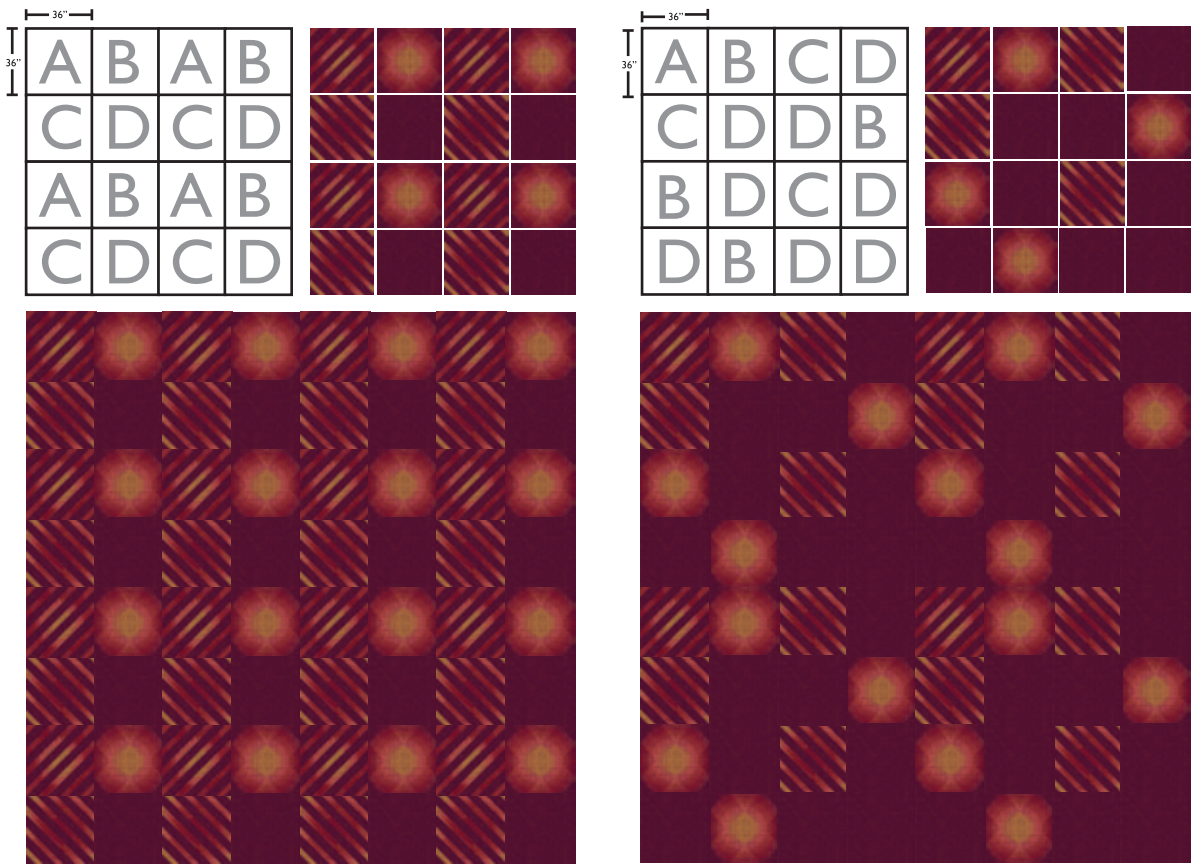

Advantages Of Brintons Tile Products

1. Transport - Brintons carpet tiles are packed in boxes so they are fully protected during transport and can be palletted for ease of handling which will minimize health and safety issues.
2. Installation - Tile installations have a number of important advantages when compared to installations of broadloom products. Brintons carpet tiles can be laid in a single process, as there is no underlay to fit. They can be laid quickly in part lot sections in order to minimize disruption. By working in small teams, the whole installation can be completed more quickly; gluing can be carried out in one section, whilst tiles are being laid in another. Even complex installations such as borders/fields/outfills take no longer to install as there are no seams. In addition, the levels of skill required are less critical.
3. Ease of Removal - Tiles can be lifted up or put down by unskilled staff when necessary for damage, underfloor heating repairs, cable access or cleaning & maintenance. Heavy use areas can be taken up and replaced with spare tiles, thus extending the life of these areas to match those, which are less used. When the life of the installation is finally over tiles are quick and easy to remove and the floor is left in a clean condition.
4. Ease of Maintenance - When spillages occur, individual tiles can be taken up to be cleaned off site, temporarily replaced with spare then re-installed minimizing disruption.
5. Flexibility for Change - Part areas can be replaced and borders or other patterns can be added if required.

SPECIFICATIONS

MIX & MATCH

Standard Tile Repeat Layout - using 4 unique tiles to make a 6'x6' repeat.*

Random Tile Repeat Layout - unique repeat using same 4 tiles. Create your own pattern.*

*Brintons recommends installation of tiles in the same pile direction
