

Brintons

Name: JW Marriott Marco Island Beach Resort
Details: Axminster: 14,000 SY
Date: 2013

For the redesigned JW Marriott Marco Island Beach Resort, Brintons supplied 14,000 square yards of custom axminster carpets to the guestroom corridors, main ballroom, and prefunction spaces. EOA Architects reworked the interiors to be centered in the Balinese technique of Batik - taking the property back to its roots.

"EoA engaged Brintons for this project simply because of their ability to produce intricate designs with seamless gradations. The project was highly demanding and Brintons was able to interpret our design concept into an exceptional carpet. Excellent work!"
