

# Brintons

**Project:** Sable at Navy Pier

**Details:** 13,000+ SY Axminster

Brintons partnered with KOO Architecture & Interior Design firm to produce 13,000+ SY Axminster carpet in all guest rooms and corridors for the new build of Sable at Navy Pier.

Named after the naval training ship, the hotel's interior design pulls inspiration from subtle nautical cues off the pier's port such as weathered brass, ship building materials, and the use of smooth curves much like a ship's interior cabin. The color palette presents mixed neutrals with highlights of blues and blue-greens reflecting the colors of the famous Michigan Lake which feels like an extension from the waves and colors of the guestroom carpet. Walking through the moody corridors also give guests the experience of crew members walking through the sacred passageway of a ship.

"Brintons found the most cost-effective way to 'book match' the guestroom carpet layouts in the seaming diagrams to get the most out of the goods with the least amount of waste possible."
