

Brintons

Project: Waverly Heights

Details: Axminster & Tufted

Brintons partnered with Waverly Heights and RLPS Architects to provide the retirement living community with custom Axminster and tufted carpet for the building's refresh.

Located in Gladwynde, PA, Waverly Heights is nestled on a 63-acre former estate exuding charm of an English cottage combined with the elegance of a luxury manor.

The Waverly Heights team opted for Brintons' Colorpoint, advanced machine tufting technology, which enables intricate textures and larger patterns with the flexibility to incorporate up to six different colors in both cut and loop styles.

The carpet is made with muted colors of greys, blues, and creams with pops of orange and is in various areas within Waverly Heights, including the lobby, conference room, staircases, and corridors. Additionally, the interior features Axminster carpet and three exquisite, Brintons tufted rugs.

"The Brintons team expertly guided us through the selection and design process to the beautiful end result. We have had nothing but compliments and kudos for the elegance the carpet lends to our community thanks to the Brintons team for helping make this happen."
