NINE BY BRINTONS

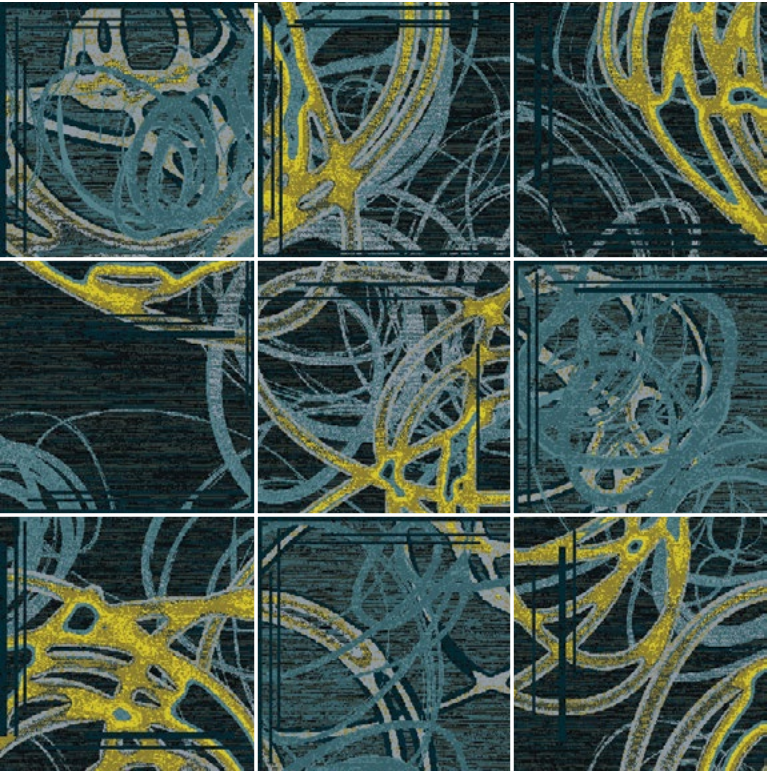

## NINE BY BRINTONS

Guided by self-expression, the Brintons design team have again poured their individual creativity into a new Axminster carpet tile collection.

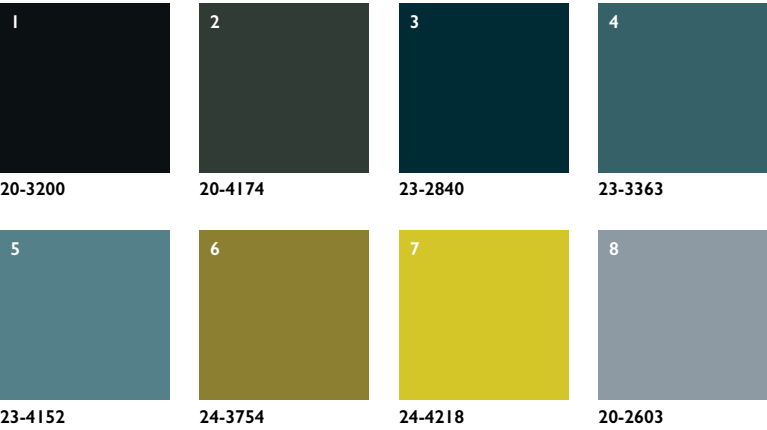

Washed in harmonizing palettes of rust and teal, the critically matched multiple tile repeats offer a broadloom in a box solution ideal for high-traffic interiors like casinos and convention centers.

Each 36" x 36" Axminster carpet tile, woven with our standard 80% wool 20% nylon yarn blend, comes with attached backing for ease of installation.

WHY BRINTONS AXMINSTER TILE?

SPECIFICALLY WOVEN TO BE A TILE:

Brintons tile offer is unique in that it combines the creativity and flexibility of the Axminster weaving process with the disciplines associated with the tile module. Almost any design achievable in broadloom can, with minor adjustment by our skilled design team, be translated into a tile that when installed will present a broadloom appearance.

ATTACHED BACKING:

The felt backing of a comfort back (tc) tile provides cushioning for greater underfoot comfort and improved sound absorption. Brintons also offers a bitumen back (tb) option where felt comfort backing is not required.

MINIMAL WASTE:

Tiles benefit from having less waste as awkwardly shaped areas can be costly to fit in broadloom, therefore ensuring more of your investment is on the floor.

FLEXIBILITY:

Almost anything you can do in a broadloom can be manufactured in tile, even large design repeats. Brintons Axminster tiles offer a broadloom solution in a box.

ACCESSIBILITY:

Damaged or soiled tiles can be replaced by maintenance staff with minimal training. Tiles also provide a convenient solution to carpeting raised access flooring by allowing in-house staff an efficient avenue to the sub-floor.

TOTAL COST OF OWNERSHIP:

The cost of tile installation can be more economical over the life of the product. A tile with attached pad makes installation quicker and more cost-effective. Areas due for refurbishment may be staggered as required.

CLEANING AND MAINTENANCE:

Wool-rich carpet tiles require less interim and intensive cleaning than many other synthetic fibers due to the unique scaled surface of the wool fiber. The wool fiber, paired with a 100% cut-pile surface, allows for a more easily maintained carpet when compared to loop-pile tufted products.

ACOUSTICS:

Brintons carpet tiles have acoustic insulation properties which reduce ambient noise created by impact or foot movement. This is an essential component when considering flooring for high-traffic areas like convention centers.

TECHNICAL SPECIFICATIONS

AX928TC	
Pitch	7.0 per inch
Rows	9.0 per inch
Pile Height Above Back	0.29 inches
Total Tile Thickness	0.66 inches
Pile Weight Above Back	29.05 oz/yd²
Total Pile Weight	38.78 oz/yd²
Total Tile Weight	166.31 oz/yd²
