This is a digital sample (VSO - Virtual Strike Off) and colors may vary depending on device. A custom sample is available and will be required for final sign off with the order. Our hope is that this new approach of using a digital sample will streamline the development process and give you a clear representation of the final product. By eliminating one physical sample from the workflow, we not only accelerate the timeline for bringing your project to life but also contribute to reducing our carbon footprint. If we can implement this approach across all our projects, imagine the positive impact we can achieve together.

Thank you for your support.

This VSO has saved an estimated 12 kg CO₂e,
compared to physical sample
