

Brintons

Project: Caesar's Forum
Details: 55,000 SY Axminster

Brintons teams up with KGA Design to design and manufacture 55,000 square yards of custom Axminster carpet for Las Vegas' newest convention center, Caesar's Forum. According to the KGA Design team, the overall project concept was to design a convention center where people can effectively connect with each other, during meetings and/or social events, while also remaining connected to nature.

"It was fun working with Brintons Americas' Leah Jack! She helped us develop our concept design to reality. She is detail oriented and efficient with providing paper strike-offs and samples when we needed them for presentations."

Rayito Carrillo
Senior Interior Designer
