

Brintons

Name: Georgia Aquarium

Details: Axminster Carpet

Tiles: 2,300 SY

Date: 2014

Brintons developed 2,300 square yards of custom axminster carpet tiles with BoggsVickers Architects for the Georgia Aquarium in Atlanta, GA.

"BoggsVickers Architects truly enjoyed working with Brintons. The carpet designs not only needed to be aesthetically complimentary to the exhibits, but also needed the ability to withstand the abuse of extremely high-traffic scenarios. We were impressed with the versatility offered by Brintons' capability to create the custom and intricate color ways typically seen in broadloom, in a tile product"

John W Boggs
