Hotel Bachleda Kasprowy

Brintons

We are proud of our long-term relationship with Hotel Bachleda Kasprowy where we have supplied carpet for the restaurants, lobbies, conference rooms and apartments. Our latest collaboration is a 100% plastic-free carpet for the guest rooms which we created with ORB Studio architects, Warsaw.

Natural, renewable and completely plastic-free, Purely Natural by Brintons is new product which was created with the good of the environment in mind. By combining wool with plant derived backing materials the Purely Natural collections are the first independently certified 100% bio based carpet by Brintons.

What makes this project special?

Biodegradable Material: Woven using 100% undyed British wool with a cotton, jute and natural rubber latex backing, this collection offers a more sustainable and renewable choice without compromising on quality and durability.

Natural Aesthetics: The natural colour and texture of the wool has enhanced the hotel's warm and luxurious atmosphere.

Water Efficiency: Brintons production process for Purely Natural used significantly less water due to the use of undyed wool.

The collaboration

The collaboration between Hotel Kasprowy, ORB Studio, and Brintons in implementing a Purely Natural Axminster carpet showcases a perfect marriage of sustainability and luxury. This case study exemplifies how businesses can adopt eco-conscious choices without compromising on quality or aesthetics.

> In particular, we wanted to bring out the character of natural materials, and the Purely Natural collection was a perfect fit. A pattern which represents woollen yarns and woven structures was created using a three-dimensional effect. The use of material and pattern was inspired by Zakopane's environment which is home to many grazing sheep, we wanted to honour wool and its weaves as a natural material for the mountains.
