Jumeirah at Etihad Towers

Brintons

Etihad Towers is one of the most spectacular developments in the Middle East. Brintons was appointed by Australian designs firm DBI Design in Queensland to design and manufacture 25,000 sqm carpets for the guestrooms, executive suites, corridors, meeting rooms and lobby bar in the hotel tower operated by Jumeirah.

> Our team was very pleased that the carpet added a level of bold sophistication and elegance, creating a memorable space. We were impressed with Brintons professionalism in assisting design development and exploring options to allow the original concept design to be maintained. We were impressed by the yarn colour choice and translation of the design to a finished product. It has been a pleasure to work with the Brintons design team.
