

Brintons

Project: Sheraton Denver Downtown

Details: 15,000 SY + Axminster

Brintons collaborated with Kay Lang + Associates & JNS Design on phases one and two of the Sheraton Denver Downtown Hotel renovation.

Kay Lang + Associates partnered with Brintons for phase one of the renovation. Taking clues from nature with organic and fresh designs, Kay Lang + Associates approached the wintery look with a lighter palette to create a modern theme.

Local Denver firm, JNS, tackled phase two of the building's renovation. JNS offers a sophisticated and modern design narrative which gives a nod to the period the hotel was originally designed and built in the late 1950s + early 1960s. Elegantly paired with the hotel's architecture and lighting, the carpet delivers a textural walk with hues of blues and golds.

"Brintons was great. They took our initial thoughts and ideas and created very useful flooded imagery so we could show our clients."
